

CLOUD CONSULTANTS

MSA has the expertise and the experience to help your business take advantage of cloud offerings and opportunities – while reducing the risks, costs and missteps that can occur.

Let MSA Be Your Guide

- Certified Cloud Consultants can develop an optimized plan based on your specific needs and requirements
- Provide guidance and recommendations on the best cloud solutions, vendors and architectures
- Design, develop and implement, as appropriate, private and hybrid cloud infrastructures

Cloud Migration Planning

- Create migration plans and schedules for moving existing workloads from current infrastructure to the most appropriate and cost-effective cloud infrastructure
- Identifying the best applications, processes and workloads for cloud resources and sequencing the transitions
- Compliance considerations

Implementation Services

- Project management
- Implementation planning & management
- Communications/network planning and management

To the cloud or not to the cloud... that is the question!

The answer varies based on your business and its specific needs. What should be in the cloud? What shouldn't? What are the costs? What are the risks? Which cloud provider is best for my requirements? Public cloud, Private cloud or a Hybrid combo? Are there any compliance issues? Once my data is in the cloud, how do I get it back? What SaaS applications are best suited to my business?

Cost & Utilization Optimization

- Cost control planning and monitoring
- Assistance with billing and monitoring alerts
- Account review and audit

On-going Support

- 24/7/365 support
- Data backup solutions
- Systems administration
- Network administration and support
- DR services

FOCUS ON YOUR BUSINESS WHILE WE FOCUS ON YOU!

MSA is an expert in cloud services so you don't have to be, which allows you to focus on making your business the best it can be!

Let us guide you through the decision making process to determine which cloud solutions are best to run your business. Public? Private? Hybrid?
